

STRATEGIC SOURCING INITIATIVES

At Intermountain, we value transparency, collaboration, and mutual success in every supplier relationship. As part of our commitment to clear communication, we're sharing our strategic sourcing initiatives to help you plan and align with our key procurement milestones.

To be considered, please register for [SupplierGATEWAY](#). Creating a profile helps our Procurement team to understand your capabilities for future sourcing opportunities. However, registration does not guarantee a response, business engagement, or placement on an approved vendor list. It also does not obligate us to request bids, quotes, or proposals. Category managers will work alongside our Value Analysis Team to evaluate any new product or service to make sure it is a good fit for our caregivers and patients. If it does, we will contact you and communicate the next steps.

2025
